---

## Professional Summary

Data Engineer with 6+ years of experience designing, building, and maintaining data pipelines, cloud data platforms, and ETL/ELT solutions. Experienced with Python, SQL, Azure, AWS, Spark, and modern data warehouse technologies. Strong background supporting analytics, reporting, and machine learning workloads through scalable data architecture.

---

## Technical Skills

### Programming:

Python, SQL, Bash, PySpark

### Cloud Platforms:

Azure, AWS

### Data Engineering:

ETL / ELT, Data Pipelines, Data Modelling, Data Warehousing, Data Governance

### Databases:

SQL Server, PostgreSQL, MySQL, Snowflake, Redshift

### Big Data / Processing:

Apache Spark, Databricks, Hadoop

### Tools:

Airflow, Docker, Git, Terraform, Jenkins

### BI / Analytics:

Power BI, Tableau

---

## Professional Experience

### Senior Data Engineer

**TechNova Solutions Pty Ltd – Brisbane, Australia**

*Jan 2023 – Present*

## **Responsibilities & Achievements:**

- Designed and implemented cloud-based ETL pipelines using Azure Data Factory and Databricks.
- Built batch and near real-time ingestion pipelines handling 200+ GB of daily business data.
- Developed reusable Python and SQL frameworks for data transformation and validation.
- Optimised Snowflake warehouse performance, reducing reporting query execution time by 40%.
- Collaborated with analytics and business teams to define data requirements and delivery schedules.
- Implemented CI/CD deployment processes using Git and Azure DevOps.

## **Technology Stack:**

Azure Data Factory, Databricks, Python, SQL, Snowflake, Git, Azure DevOps

---

## **Data Engineer**

### **Insight Analytics Group – Melbourne, Australia**

*Jun 2020 – Dec 2022*

- Built enterprise ETL workflows migrating on-premise SQL workloads to AWS.
- Developed Airflow orchestration pipelines for scheduled data processing.
- Created dimensional data models supporting Power BI reporting environments.
- Automated data quality checks and monitoring alerts.
- Supported data warehouse design and schema optimisation.

## **Technology Stack:**

AWS, Airflow, Python, SQL Server, Redshift, Power BI

---

## **Junior Data Engineer / BI Developer**

### **Metro Retail Systems – Sydney, Australia**

*Mar 2018 – May 2020*

- Maintained SQL Server ETL jobs and reporting databases.
- Developed Power BI dashboards for finance, operations, and sales teams.
- Assisted in migrating legacy reporting systems to modern cloud infrastructure.
- Improved ETL reliability by implementing automated error handling and logging.

## **Technology Stack:**

SQL Server, SSIS, Power BI, Python

---

# Education

## Bachelor of Information Technology

The University of Queensland  
Graduated: 2017

---

## Certifications

- Microsoft Certified: Azure Data Engineer Associate
  - AWS Certified Cloud Practitioner
  - Databricks Certified Data Engineer Associate
- 

## Projects

### Customer Churn Data Platform

Designed a cloud data platform ingesting CRM, billing, and customer support data into Snowflake.

#### Features:

- Automated ELT pipelines.
- Data validation framework.
- Feature engineering support for ML models.
- Dashboard integration for business reporting.

**Tools:** Python, Airflow, Snowflake, AWS S3.

---

### Streaming Event Pipeline

Built a streaming analytics pipeline processing application log events.

**Tools:** Apache Kafka, Spark Streaming, Databricks, Azure.

---

## Key Strengths

- Strong SQL and data modelling capability.
- Cloud-native data platform design.
- ETL / ELT pipeline development.
- Performance tuning and optimisation.
- Stakeholder communication and technical documentation.
